

Public Services Council

## Goals for Academic Year 2006

The overarching theme for activities for this year is to refocus on our core mission of service to users. The following goals were recommended for academic year 2006:

### **Reference**

Expanding/altering traditional reference services and re-examining the role of reference librarians in light of the institutional repository.

Continue to explore the relationship of our reference services with NJ Q&A.

### **Federated Searching**

Investigate federated searching in light of the forthcoming NISO standards, which are being adopted by vendors.

### **Bibliographic Management Software**

Plan for the Libraries' role in the event that either RefWorks or Endnotes is adopted at the university.

### **Planning and Assessment**

Develop additional goals responsive to the repository, curriculum changes, the long-range plan, and LibQUAL+ results
