

Adoption of the Provider-Neutral E-Monograph MARC Record Guide
At Rutgers University Libraries

In October, 2010, the Central Technical Services Managers agreed to adopt the [Provider-Neutral E-Monograph MARC Record Guide](#) as a guide for cataloging e-monographs at Rutgers University, with the following exceptions:

1. We will continue to use subfield \$z in the 856 field for institution-specific information. (p.19)
2. We will continue to code and accept in cataloging copy 008/23 \$s as specified in the guidelines, despite the advent of values \$o and \$q. However, we will still accept any of the three values in cataloging copy.

It should also be noted that, as stated in Records for Multiple Formats, all manifestations of a single work, including print, microform, and electronic (both direct and remote access) are cataloged on a single record.
