Benefits of Server Virtualization

Why server virtualization?

**Separation** of development, testing and production environments

**Stand-by** server for high-availability in case of malfunction or planned downtime

**Individually dedicated servers** for developers

---

**Benefits**

- **Financial Benefits**
- **Utilization Benefits**
- **Energy Savings**
- **Reduced downtime during updates**

**Legend**

- Development (before release)
- Testing (preparing for release)
- Production (go live)
