

Everyone is invited to have coffee and chat about important issues in science at the SEBS

Science Café series

Thursday, November 14

10-11:00 AM

Chang Science Library, Cook Campus

Microbes are in the Atmosphere!

Donna Fennell and Kevin Dillon
Environmental Sciences

Microorganisms enter the atmosphere from a variety of sources including plant surfaces, soils, and bodies of water. They are present not only in the air, but also in clouds and rain. Are these microorganisms active? How do they impact Earth's processes? We will discuss this fascinating field of study and highlight some of the research being performed at Rutgers.

Future Cafes:
Watch for our Spring 2020 series!

Sponsored by SEBS Academic Programs, the Cook Campus Dean for Community Engagement,
& the Department of Human Ecology
