Libraries' research project on video use in the classroom

Media creation, distribution, and consumption are faster and cheaper than ever before and video use on campuses is rapidly accelerating. Rutgers University Libraries collects and makes available material in many formats, including moving images and streaming video. In an effort to engage faculty in transforming the cataloging and discovery of video in library collections, we invite you to read on and participate in a short survey. (Continued)

Easy access to a wealth of research on NJ's environment:

The New Jersey Environmental Digital Library

The New Jersey Environmental Digital Library (NJEDL) is a treasure-trove of materials on environmental issues that both confront and enrich our state and its people. NJEDL is the product of collaboration between the Rutgers University Libraries and the New Jersey Department of Environmental Protection. NJEDL provides access to an impressive array of materials ranging from general information for citizens to research publications. An extensive directory of environmental organizations enables users to contact agencies and experts in specific areas of interest. (Full Story)

Spotlight

Social Explorer:

Map Visualizations, Reports and More...

Social Explorer is a resource that creates maps and reports using demographic information from 220 years of Census data gathered from 1790 to 2010, as well as Religion Data provided by ARDA (Association of Religion Data Archives).

The beauty in this resource is its simple, clean, and user-friendly interface and the ease in which a user can create meaningful images and data reports. To see an example of a data map and read more about the features of Social Explorer, please click here. To interact with Social Explorer, click here.

The Cochrane Library:

Supporting Evidence-Based Healthcare Decision Making

The Cochrane Library contains different types of high-quality, independent evidence to inform healthcare decision-making. It consists of seven closely related databases, containing a wealth of information, and it features search capabilities across all seven databases, returning comprehensive results. The producers are the Cochrane Collaboration - a network of researchers, practioners, and providers, as well as patients.

For more highlights of The Cochrane Library, please click here, or to access it, please click here.
