RUanalytic: Create video playlists for research and instruction

We are pleased to announce that RUanalytic is now available. RUanalytic allows students and faculty members to create a playlist of video clips that can be annotated, analyzed, and published for use in research, dissertations, and instruction. The RUanalytic allows users to include annotations specific to each clip and clips from multiple videos. The Libraries developed this tool after intensive design research for an NSF-funded mathematics education grant, in collaboration with the Rutgers Graduate School of Education. RU Senate Votes to Make Research Publicly Available

At their October 19th meeting the University Senate overwhelmingly approved a resolution, proposed by the Open Access Subcommittee, that states that the university should "establish, in conjunction with University Counsel, a University-wide Open Access policy wherein Rutgers faculty and scholars, including graduate students and postdoctoral researchers, shall provide open access to all works that are produced without expectation of payment, subject to waivers and embargoes upon request by an individual author for a specific work." In his address to the Senate later in the meeting, Rutgers University President Robert Barchi spoke in support of the resolution. Read more about this exciting development [here](#).

Journal of the RULibraries Celebrates 75 Years

Launched in December 1937, Journal of the Rutgers University Libraries is the longest running scholarly-oriented publication of the Rutgers University Libraries. This year, it reached a milestone of seventy-five years. Please join us in celebrating this accomplishment on Thursday, December 6th. To read more and for event details, click [here](#).

New! Pharmaceuticals Sciences Resource

Red Book Online is one of the main components of the larger resource Micromedex 2.0, which provides evidence-based drug information and clinical answers. Red Book Online allows you to search for prescription or over the counter medications, nutraceuticals, bulk chemicals, medical devices or supplies by product name or manufacturer. The most compelling feature of the Red Book is that it provides the Average Wholesale Price (AWP) for all medications. To access this resource, click [here](#).

Expert Tip: Get Books Faster with E-ZBorrow

Need a book owned by Rutgers, but no copies are available? To save yourself time and trouble, don't 'Recall' the book, use the E-ZBORROW option instead. An E-ZBorrow request will arrive within 3-5 business days, while a Book Delivery/Recall request can take up to two weeks or longer. To promote this preferred option, the E-ZBORROW button will appear first when this situation occurs. So let us help you get that book quicker - choose the "E-ZBorrow" button if a Rutgers book is checked out.
